Untapped International School Demands

Why more international school keep opening [1]

- A desire for schooling that offers English as the language of learning, as well as offers the qualifications recognized and valued by respected universities and employers around the world.
- A desire by more young people to study to higher education, and to aspire to higher education beyond their home country.
- The ability of more families to afford private schooling (International school). In many country, education is considered a priority investment by many families who can afford it.
- Within a location, a lack of alternative education option that offer globally recognized qualifications, learning in the English language, and a style of teaching and learning

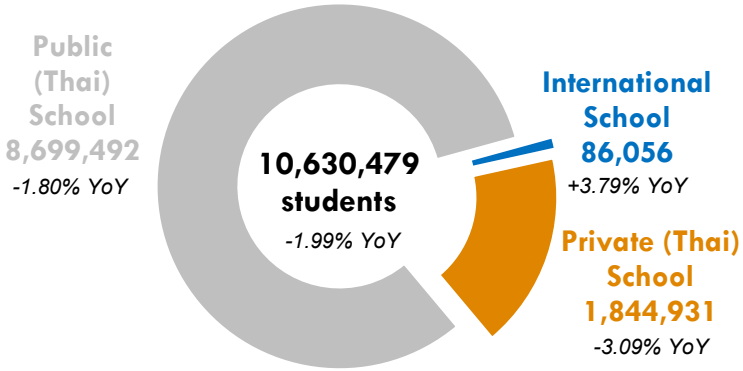

New demands in upcountry/suburb areas

- **Looking for new demands** in **upcountry/suburb areas** with lower fee international school business model
- We aim to **tap into a new, sizeable target group** beyond the international education market in Thailand, i.e. new families and students enrolling in EP/bilingual schools
- This will also serve as **a model to expand to Greater Bangkok and upcountry**

The Opportunity

SISB's current market

Potential for SISB to capture market in private schools, notably in EP programmes

- As the average tuition fee for international schools remain high in Thailand, the Marina Project (Marina Singapore Int'l School, more affordable price) aims to provide an alternative option for families who are looking for quality education, at an affordable price
- The Marina Project will also continue to leverage SISB School's selling point – it's offering of holistic education and the Singapore curriculum, which has a strong emphasis in Mathematics, Science and Chinese

The top 5 factor that differentiate international school [1]

1. **English as a medium of instruction.** According to OECD in its 2020 report How Language Learning Opens Door, the English language is the one considered most necessary for education and work. This OECD research paper undergirded and shaped the Foreign Language Assessment (FLA) which PISA will be introducing in 2025

2. **The teachers.** Most international schools employ expatriate teacher with the skills to teach the curriculum, and with the experience to facilitate the learning approach that is delivered by the school.

3. **Class size and student:teacher interaction.** Most international schools have much smaller class sizes than other school types serving the same age of children. The current average student:teacher ratio across the entire international school sector is 10:1.

4. **Pathway to global higher education.** Most international school follow a curriculum that prepare students for globally recognized qualifications.

5. **Holistic development of students.** International school are recognized for focusing on a more holistic development of student i.e. addressing the social, emotional, psychological and academic growth of each children. This is delivered through practical creative arts and sports learning and facilities, learning outside the classroom, and service learning, as well as through pastoral initiatives, extracurricular activities, etc
